Pune, India | +91 9767370556 | tajayaan18@gmail.com

AI Engineer | Machine Learning | Python | LLMs | Data-Driven Solutions

PROFESSIONAL SUMMARY

Motivated and detail-oriented aspiring AI Engineer with a strong foundation in Python programming, machine learning, and large language models (LLMs). Currently pursuing a Bachelor of Engineering in Artificial Intelligence and Data Science at Dr. D.Y. Patil College of Engineering, Talegaon Varale. Passionate about building intelligent systems, automating workflows using AI, and deploying scalable ML solutions. Eager to apply theoretical knowledge to real-world AI and data engineering challenges.

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL, JavaScript (Basic)

AI / ML Frameworks: Scikit-learn, TensorFlow (Basics), Keras, Hugging Face Transformers

Generative AI & LLMs: Large Language Models (LLMs), Generative AI, Prompt Engineering, LangChain (Basics), Pydantic, Structured Outputs, OpenAI API, Groq API, Anthropic API, Google Gemini API

RAG & Vector Databases: Retrieval-Augmented Generation (RAG), Text Embeddings, Semantic Search, FAISS, ChromaDB, Qdrant

AI Agents & Orchestration: AI Agents, Function Calling, Tool Calling, LangGraph, Multi-Agent Systems, Model Context Protocol (MCP)

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook, Google Colab

Databases: MySQL, Vector Databases

Backend, Tools & Deployment: FastAPI, REST APIs, Git, GitHub, VS Code, Streamlit, Full-Stack AI Integration, AI Application Deployment

Production AI: LLM Evaluation, RAGAS, Observability, Guardrails, Error Handling, Asynchronous Programming

Operating Systems: Windows

Soft Skills: Analytical Thinking, Problem Solving, Technical Documentation, Team Collaboration, Quick Learning

EDUCATION

Bachelor of Engineering – Artificial Intelligence and Data Science | Dr. D.Y. Patil College of Engineering, Talegaon Varale **Aug 2024 – Prese**

- **Relevant Coursework:** Data Structures, Algorithms, Database Management Systems, Operating Systems, Artificial Intelligence, Computer Networks, OOPS
- Actively participating in technical workshops and AI/ML seminars

PROJECTS

HireMe.AI – AI-Powered Resume Parsing & Interrogation Platform **Live Demo | GitHub**

Tech Stack: *Python, FastAPI, React.js, Tailwind CSS v4, Groq LPU API, Pydantic, PyPDF*

- Architected a full-stack AI candidate evaluation system that extracts unstructured PDF resume text and enforces strict JSON schema validation via Pydantic for zero-hallucination Q&A.
- Engineered a dual-model inference pipeline on Groq (Llama-3.1-8B for sub-second JSON parsing and 120B/70B models for reasoning) paired with file-timestamp memory caching, reducing response latency by over 80%.
- Built an executive-style glassmorphic React dashboard featuring real-time HTTP token streaming (ReadableStream), dynamic candidate dossier generation, and custom GFM Markdown table rendering.

CURRENTLY LEARNING

- **Advanced Machine Learning –** neural networks, model fine-tuning, and hyperparameter optimization
- **Large Language Models (LLMs) –** LangChain agents, function calling, and prompt engineering techniques
- **MLOps fundamentals –** model versioning, deployment pipelines, and monitoring
- **Cloud AI services –** AWS SageMaker and Google Vertex AI (basics)
- Building end-to-end AI projects for portfolio development

CERTIFICATIONS & COURSES

- Python for Everybody – Coursera (in progress)

- Machine Learning Specialization – Andrew Ng, Coursera (in progress)
- Hands-On Large Language Models – Practical AI study
- CS50's Introduction to Artificial Intelligence with Python – Harvard OpenCourseWare
